

IKS KlingelInberg supports the initiative "Germany - Land of Ideas"

During the soccer world cup 2006 Germany will host the world. We will show the best sides of our country to our guests:

with the ideas of the people who live here. We want to show the world how German poets and thinkers, researchers and inventors, artists and composer have been making life more comfortable, safer and more beautiful for centuries. For this the initiative "Germany - Land of Ideas" was founded. The IKS KlingelInberg GmbH Remscheid and KlingelInberg GmbH Hueckeswagen joined this initiative as [official partner](#). "Germany - Land of Ideas" emphasises the strength of the location Germany and reflects fundamental qualities of the Germans: Creative imagination, inventive passion und visionary thinking.

As an innovative company effected from the creative imagination of its employees we see ourselves as a part of this initiative.

Germany's progress in the development could be seen in the past, can currently be observed and will be determined in the future by the ideas of the people living in this country. Excellence in science and economy, art and culture will prove the label "Made in Germany" and this is valid in particular for IKS KlingelInberg people and products.
