## KNIVES FOR THE WOOD PROCESSING INDUSTRY

For almost 100 years the IKS Klingelberg Group has pioneered the manufacturing of high quality industrial knives.

Our main product lines for the wood processing industries are:

- Veneer slicer knives and rotary peeling knives
- Nose bars and pressure bars
- Veneer clipper knives
- Chipper and Counter knives
- Flaker knives, wear shoes and wear and tear parts

All of the above require precision manufacturing and accurate heat treatment. We are one of only a few industrial knife makers in the world to meet the tolerances as requested by the highest standards.

Our group's extensive research and development combines decades of industrial knife making know-how with the latest manufacturing and heat treating techniques available today.

Extreme flatness, parallelism and edge holding ability provide hours of continuous veneer cutting to closely controlled thickness requirements.

Additionally, we precision polish the knife surfaces and cutting edges for the majority of knife designs.

IKS Klingelberg high alloy steel slicing and peeling knives are available in lengths up to 6000 mm.

IKS Klingelberg Knives are produced according to DIN EN ISO 9001:2000 Standards.
