PAPER CUTTING KNIVES FOR THE GRAPHIC ART INDUSTRY

Tradition

ABOUT US

A long tradition signifies commitment. The history of our company can be traced back to 1814. The manufacturing of machine knives started in 1908. Klingelberg today is numbered as one of the oldest existing machine knife factories in the region called "Bergisches Land". Over the decades, this region has built

up a worldwide reputation. Only by constant improvements developing specialised expertise, could the challenges of the market be met. Close cooperation with leading steel mills on one side, good connections and exceptional partnerships with innovative key customers has guaranteed a continuing positive development.

QUALITIES

The knives are offered in the following material grades:

DURAPID

THE COST EFFECTIVE STANDARD KNIFE

CHROMALIT

THE 12 % SOLID CHROME STEEL QUALITY FOR TRIMMER KNIVES

DURITAN

THE 18 % TUNGSTEN HSS INLAID OEM KNIFE QUALITY

INCOMET SUPREME

THE NEW SUB MICRON TUNGSTEN CARBIDE GENERATION FOR THE BENCHMARK CUTTING SOLUTION

Guillotine Knives

3-Way Trimmer Knives

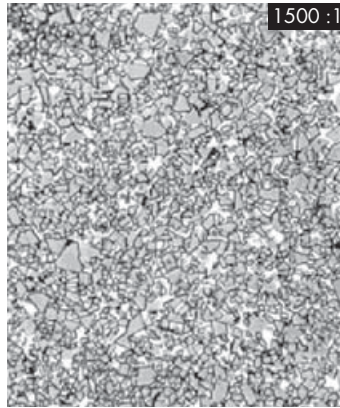

Trimmer Knives

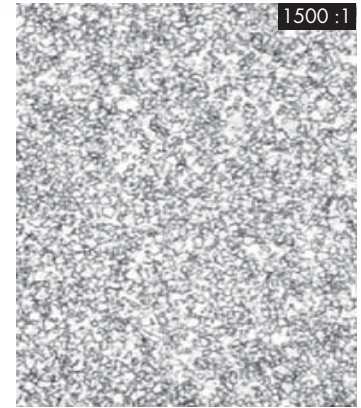

INCOMET SUPREME KNIFE

(SUB-MICRON TUNGSTEN CARBIDE INLAY)

The IKS Klingelberg Incomet Supreme knife is the latest innovation of cutting edge technology in the evolution of the already popular Incomet quality knife. The sub micron tungsten carbide inlay features a superior hardness density and wear resistance cutting edge. This provides significant increased knife life, and the benefit of extended productivity between knife exchanges. The Incomet Supreme knife gives the customer a tremendous advantage over standard quality carbide knives.

Conventional Tungsten Carbide

Sub Micron Tungsten Carbide Incomet Supreme

Cutting Sticks

CUTTING STICKS

The relationship between the paper knife and the right choice of cutting stick is essential for optimum performance in any quality cutting system. The general rule is; the softer the knife the harder the cutting stick, and the harder the knife the softer the cutting stick. The universal quality design of the IKS Klingelberg Blue cutting stick insures its use with all grades of steel hardness. Universal cutting sticks will save time, and increase productivity as a result.

Spare Parts

Milling Tools

ROTARY CUTTING AND MILLING TOOLS

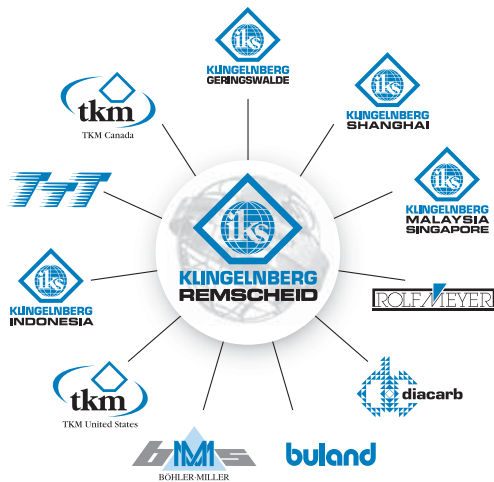

IKS Klingelberg offers a wide variety of high quality precision rotary cutting and milling tools used in the adhesive process for the book binding industry. IKS Klingelberg provides these rotary cutting tools complete with the steel body, solid tungsten carbide inserts, either in the brazed or screw versions. A wide stock variety of these tools meets immediate requirements.

SPARE PARTS FOR THE PRINTING AND PACKAGING INDUSTRY

IKS Klingelberg produces and supplies an extensive line of products for the Print Converting Industry, as well as offering a wide range of precision cutting tools for gravure, rotary offset printing illustrations, and rotary offset newspaper printing.
